

XM is the greatest thing in years as far as "radio" entertainment. I am a trucker and XM has provided many of hours of entertainment for me. Maybe the "old boys" should step up to the plate of competition (you know, the American way) instead of paying the lobbyists to cry for them and to buy what they want. I PAY for this service-it is not a free "deal". Therefore, get off XM! People that wish not to pay for this service don't. XM never solicited me to join-I found XM. Being a trucker, I benefit from traffic and weather channels. It helps me make wise decisions and makes me safer when I have readily available information regarding weather and traffic. The NAB should not have the right to dictate to me what I have the right to hear. Do I not have my Constitutional rights or are they thrown out in cases where certain people and organizations PROFIT from raping me of my rights? The NAB needs to look for ways to improve their services instead of crying about competition. I would be ashamed if my "free" service could not compete with a paid service.
